

Your Name:	Alex Veit	Date:	5/29/2013
Group Name:	Group 2	Project & Sprint: (e.g. 'Project 1, Sprint 1')	Project 1, Sprint 1

**\*\*\* YOU MUST USE MICROSOFT WORD 2010 OR LATER TO EDIT AND SAVE THIS DOCUMENT! \*\*\***

**Submission Instructions:** You must upload a PDF of this form . Name your file according to the following scheme:

LASTNAME-2013-MM-DD-PeerReview.pdf

where "LASTNAME" is your last name, "MM" is the TWO-DIGIT month, and "DD" is the TWO-DIGIT day.

**Form Instructions:** You must evaluate each group member – INCLUDING YOURSELF – in the space provided below. First, fill in the names of yourself and your team members; then assign a rating for each category on a 5-point scale (0 being the worst, 5 being absolutely perfect). **NOTE: No team member is ever 'perfect'. Simply assigning all 5s or scores that add up to 35 or higher are unlikely and must be justified or they will be viewed poorly.**

	Yourself	Member Two	Member Three	Member Four
First Name:	Alex	Damon	Paul	Karl
Last Name:	Veit	Heard	Amtoime	Loic

### **Personal Metrics**

	Rating (zero to five)	Rating (zero to five)	Rating (zero to five)	Rating (zero to five)
Attitude toward project and achieving a good result	5	4	3	5
Quality of work contributed by each team member	4	3	1	3
Attendance at meetings	4	5	5	5
Communication during meetings	5	3	2	4
Communication outside of meetings	3	2	2	4
Efforts to share work and contribute as "part of the team"	3	3	2	4
Ability to meet deadlines	3	4	4	4
Meeting the team's expectations	4	3	2	4
Total	31 <sub>(40 max)</sub>	27 <sub>(40 max)</sub>	21 <sub>(40 max)</sub>	33 <sub>(40 max)</sub>

### **Contribution Metrics**

Suppose you have 97 units of something desirable to distribute across your team in proportion to their overall contribution and effort. How would you distribute those 97 points for each of the following categories? The sum over all of the team members FOR EACH CATEGORY will be 97%; with no fractions. In other words, each ROW must add up to 97.

**NOTE: No team members ever contribute equally to a project. Simply assigning 32 – 32 – 33 to make it look even and avoid favoritism is not acceptable and will be viewed poorly – that means YOUR peer review score will be penalized for poor feedback.**

	Some portion of 97	Some portion of 97	Some portion of 97	Some portion of 97
Overall Contribution (0 points left to distribute)	28	30	7	32
Design & Planning (0 points left to distribute)	17	35	10	35
Development & Coding (0 points left to distribute)	43	25	0	29
System Admin. & Tech Support (0 points left to distribute)	30	30	7	30
Documentation & Paperwork (0 points left to distribute)	10	40	10	37

## Descriptive Comments

Answer each of the following in **complete sentences**. Your responses should be at least **several sentences in length**. You must provide **DESCRIPTIVE and QUALITATIVE** comments on each member's part in the team's work (including yourself!). Failure to provide meaningful and specific feedback, or simply giving "pro forma" praise such as "did a good job" will be viewed poorly.

<b>Major Contributions</b> <i>What did each member contribute to the project for this cycle?</i>	
AlexVeit	I developed - for the most part - the back end .php to handle user interactions with the database, i.e., create & validate accounts, as well as integrate this information with the layout in form of html and .css. I also wrote some simple javascript routines to account for human input validation.
DamonHeard	Damon organized the user stories in order of priority. He also made possible the current webpage layout we are using.
PaulAmtoime	Im sure Paul is a great individual, but I hate to say I'm not sure what his contribution are. I'll give him the benefit of the doubt and assume he has been communicating with the other members, because other than being on time for the meetings, I can't put my finger on any solid contribution from Paul.
KarlLoic	Karl wrote a critical piece of php to upload any type of file to the database. If he had not written those 30 +/- lines of code, I'm not sure where we would be.
<b>Strengths&amp; Weaknesses</b> <i>What were each member's major strength(s) and weakness(es) for this cycle?</i>	
AlexVeit	I like organized code and design, so I strive to improve what we already have. My problem is that every development I've ever done, for fun or for serious purposes, has been on my own. I guess what I'm really trying to say is that I may have an issue trusting other people to "get the job done", so I tend to carry more weight. I like taking the lead, and it has done well for me in the past. But in the SCRUM environment this mentality might be my achilles heel.
DamonHeard	Damon was quick on the trigger as far as providing a layout for the webpage. He had it in a presentable form by the first meeting. My only concern is that he may not be totally familiar with common development conventions such as indentation and modularization. I was extremely pleased with the layout he pulled off, but when I saw the code, it was a total mess. It took me a while to sort out the funkiness and make it somewhat readable.
PaulAmtoime	Paul's strength is also his weakness. It is known that in order for one to be a great speaker one must be a great listener. Paul's issue is that he is constantly listening but hardly ever speaking. I attribute that to the fact that the material that we are working on, seems to be slightly beyond the scope of what Paul is comfortable with.
KarlLoic	Karl is not timid, actually he is pretty confident and outgoing. He wants to learn and is extremely humble. He appears to be familiar with the material at hand and has a genuine concern with the project completion.
<b>Attitude &amp; Teamwork</b> <i>Describe each member's attitude, personality, and ability to work in a team.</i>	
AlexVeit	I want to write the best Honeycomb app and gain enough recognition to maybe one day have our project as a reference for students in future SWE 3613 classes. I like to subtly wake people's mind to the universal consciousness that we all tap into as living beings; unleashing the potential that we all are endowed with.
DamonHeard	I feel like Damon is riding the wave and picking up mundane or simple task along the way.
PaulAmtoime	Paul has a positive attitude but perhaps a lack of commitment or sense of urgency. I wish he would voice his opinion, so we can actually be able to assess his participation.
KarlLoic	Karl is the mayonnaise of the whole team, he is the one coordinating meetings, contacting every team member, scheduling, as well as keeping a constant positive attitude.
